

Drone Roof Inspection Notes

www.IonSystemSolutions.com
Michael@IonSystemSolutions.com

- View Top of roof via Google Earth prior to determine take off areas
- Maintain extreme safe flight patterns around home
- List notes below for report when flight is done or to be dictated to assistant.

OBSTRUCTIONS – list out items seen in your research of the area before the flight

-
-

ROOF SPECIFICS – shingles, venting, chimney, gutters and anything else seen from the drone

-
-
-
-

DECK – if there is a deck, be sure to safely fly around to observe any issues

-
-
-
-

EXTRA BUILDINGS – if hired to do so, survey extra buildings and structures.

-
-

NOTES – anything else

-
-
-
